```
#include int main () { int num1,num2; float a,b,c; printf("Enter 1st number\n");
scanf("%d",&num1); printf("Enter 2nd number\n"); scanf("%d",&num2); a=num1/num2; b=
(float)num1/num2; c=(float)(num1/num2); printf("Result of a/b:%.2f\n",a); printf("Result of
(float)a/b:%.2f\n",b); printf("Result of (float)(a/b):%.2f\n",c); return 0; }
```
